👤 PROFILE

Software Developer with over 4 years of experience in frontend development, capable of delivering **responsive, accesible and SEO-optimized Frontend** projects using **JavaScript, React, NextJS** and **Astro**, with the addition of **UI/UX** knowledge and **Figma**.

Eager to expand my expertise to include more technologies.

📁 EMPLOYMENT HISTORY

Frontend Developer at SuenhoLucido, Remote

March 2022 — Present

- **Collaborated** with the team to **migrate** the web application from **MUI v4** to **MUI v5**, while implementing a new design with the addition of **TypeScript**, resulting in a **modern** user and development **experience**.
- Took charge of **identifying** and **rectifying reported bugs**, ensuring a seamless user experience.
- Continuously **developed** and **refined key application features**, elevating the overall user experience and functionality of the web app.
- Integrate **GitHub Actions** with **Playwright** to **automate testing** processes, enhancing CI/CD pipelines

★ PROJECTS

Github Finder, Asunción

GitHub profile browser made in **React**, uses **React-Router V6** for routes and **Axios** to communicate with GitHub's public **API** to obtain and offer GitHub user data, is able to show a list of the user's repositories and preview the title, the description and the language used.

For the UI I used **Chakra UI**, a React component library, which I adapted as needed to recreate Alyssa X's *Open Source Design Platform* at dribbble.com.

The code is available on my GitHub and the demo hosted on the **Netlify** platform:

<https://licf-github-finder.netlify.app>

e-commerce website, Asunción

2020

This is a project made to put into practice **HTML5** and **responsive CSS3**.

The code is available on my GitHub and the demo hosted on **GitHub Pages**:

https://licf01.github.io/e-commerce_project/
